

HAWORTH

# Task Seating Choices for Cleanability

December 2021

All Haworth task seating is easily cleanable to support employee well-being and your facility needs. Mesh, most upholstery, and frames can be cleaned with soap and water or disinfecting wipes. Chair bases in polished aluminum, painted aluminum, or plastic can be cleaned with disinfecting wipes. In addition, the options for back jackets, fully wrapped upholstery, and knits described below offer bleach cleanability as well as a comfortable, attractive aesthetic.

### Back Jacket Features – Zody and Very

- Seat upholstery and back jacket material options include bleach cleanable fabrics and faux leathers for easier and more efficient cleaning/disinfecting
- Popular bleach cleanable options include Brisa and Wellington
- Back jacket wraps around top trim of chair leaving mesh on back of chair exposed

Zody® Task Chair

Very® Task Chair

### Fully Upholstered Features – Fern and Soji

- Fern's seat and back may be upholstered in bleach cleanable faux leather
- Soji's seat and back may be upholstered in bleach cleanable fabric or faux leather
- The Soji task chair's upholstery comes with an option for a backer in woven fabric or, for additional cleanability, Wellington faux leather

Fern® Task Chair

Soji® Task Chair

### Knit Features – Zody, Very, and Soji

- Cleanable with a 2% bleach solution, per CDC guidelines
- Knit is standard on Soji, optional on Zody and Very; the knit option on Fern is **not** bleach cleanable

These are just some of the solutions we can provide to help you balance the needs of people and space in the workplace. Visit [surfaces.haworth.com](https://surfaces.haworth.com) or contact your Haworth representative for more information.
