

HAWORTH

Acrylic Desktop Separation Screen

May 2020

Desktop screens can be used to create physical separation between workpoints, supporting people’s well-being and performance. This durable translucent screen has rubber bumpers on the bottom edges to sit securely on your desktop without moving or damaging surfaces. Available in multiple heights, depths, and widths, the acrylic desktop separation screen can be used on a variety of fixed and height-adjustable worksurfaces.

Features

- Durable acrylic plastic construction
- Translucent material allows for light transmission into the workspace
- Heights: 24" and 30"
- Depths: 24" and 30"; 30" depth can be used on 36"-deep worksurfaces
- Widths: 42", 48", 54", 60", 66", and 72"
- Quick and easy assembly
- Back cut-out allows for cord management and the mounting of selected monitor arms
- May be disinfected with a diluted bleach solution
- 100% recyclable

Pictured are just some of the solutions we can provide to help you balance the needs of people and space as you return to the workplace. Visit haworth.com/rtw or contact your Haworth representative for more information.
